BRAND GUIDELINES

NYNA

Professional IT, web & hardware — London

Version 1.0 · 2026 · nyna.co.uk

The essence.

NYNA is a London studio delivering engineering-grade IT, web and hardware solutions — from pixel-perfect, hand-coded websites to custom PCB design. The identity is built like the work: dark, precise and quietly confident, carried by a single accent and a calm technical voice.

Precise · Technical · Confident · Minimal · Engineered

- Dark is home — light mode is the guest.
- One accent. Never competing hues, never gradients of many colours.
- Negative space is a feature, not a gap.
- Motion is calm and continuous, never decorative.

02 — LOGO

The wordmark.

NYNA

Clearspace & sizing

Keep clearspace around the wordmark equal to the height of the letter ‘N’. The set in Unbounded Medium with light letter-spacing. Minimum width 96px on screen, 24mm in print.

Do

- Use on #0D1116 or #ECEFF3
- Preserve clearspace
- Keep it Unbounded Medium

Don't

- × Stretch, skew or rotate
- × Recolour or add gradients
- × Add shadows or outlines

03 — COLOUR

Palette.

Dark is primary. A single sky-blue accent carries emphasis — used sparingly. Light mode mirrors the system with inverted neutrals.

05 — MOTION & MOTIF

The wave.

A flowing wave-line field sits behind the experience — calm, continuous motion that suggests signal, flow and precision. Pair it with deep negative space and a single accent glow. Never let it compete with content.

Iconography

Thin line icons, 1.5–2px stroke, rounded caps and joins. Monochrome on the surface; accent only to signal state.

06 — VOICE & CONTACT

How we speak.

Plain, precise, quietly confident. We explain engineering in human terms and let the work carry the weight. No hype, no jargon for its own sake.

Say	“We design the board, not just the code.”
Say	“Built to perform — and to last.”
Avoid	“Synergistic next-gen disruptive solutions.”
